Profile

Angular Developer with 1.6 years of experience in building responsive and scalable web applications using Angular 19, TypeScript, HTML, CSS, and REST APIs. Experienced in developing reusable components, integrating APIs, and collaborating with Agile teams. Passionate about building high-quality front-end applications and continuously learning modern Angular features.

Skills

Languages: HTML5 | CSS3 | TypeScript | Python

Frameworks: Angular 19 | Tailwind CSS | Node.js | Express.js | Flask (Basic)

Database: SQLite

AI / Machine Learning: TensorFlow | Keras | OpenCV | CNN

Tools: Git | GitHub | VS Code | Vercel | Render

Languages

- English
- Tamil

Experience

Umaiyaal Infotech Technologies (1.6 years)

01/2025 – 06/2026

- Developed Angular 19 web applications using TypeScript and Tailwind CSS.
- Integrated REST APIs and built reusable UI components with Reactive Forms.
- Improved application performance, resolved bugs, and collaborated in Agile teams.
- Contributed to AI-based image processing and Python application development.

Education

B.E Computer Science and Engineering

Chettinad College of Engineering and Technology, Puliur

2020 – 2023 | Karur

Projects

QuickDelivery (Kuwait Client Project)

Technologies: Angular 19, TypeScript, HTML5, Tailwind CSS, REST API

- Developed responsive Angular web application and integrated REST APIs.
- Built reusable UI components and improved application performance.

Crop Identification System

Technologies: Python, Flask, TensorFlow, Keras, OpenCV, CNN

- Developed an AI-based crop disease detection system using TensorFlow and CNN.
- Built Flask APIs for image prediction.

(Personal GitHub Project)

Loan Management System 🔗 (Full Stack)

Technologies: Angular 19, TypeScript, HTML5, Tailwind CSS, Node.js, Express.js, SQL, REST API

- Developed a full-stack loan management application with authentication and CRUD operations.
- Built REST APIs and integrated MySQL database.

Dog Breed Identification 🔗 & Leaf Disease Identification 🔗

Technologies: Python, Flask, TensorFlow, Keras, OpenCV, CNN

SquadSports (UI Recreation) 🔗 & Amaze PMS (UI Recreation) 🔗

Technologies: Angular 19, TypeScript, HTML5, Tailwind CSS, Git, GitHub

- Developed responsive UI using Angular 19 and Tailwind CSS.
